

# **bizhub PRESS C1100 and C1085**

High performance and productivity  
with true colour output, taking digital  
print to the next level

# Expand your business with Konica Minolta's fastest and most productive digital presses

Konica Minolta has designed the bizhub PRESS C1100 and C1085 to meet the very highest standards of productivity and quality. These presses achieve speeds up to 100 ipm – with outstanding colour reproduction and registration stability, combined with excellent overall print quality.

They can be configured for a wide range of print jobs, with one of the largest available ranges of modular in-line finishing options. The bizhub PRESS C1100 and C1085 have been engineered for round-the-clock operation, routinely delivering up to 1 million impressions per month.

These top-end digital presses are the natural choice for environments looking for high productivity, superb image quality and reliability. With their improved job-to-print times, and increased capabilities, the bizhub PRESS C1100 and C1085 will keep your jobs moving, and help your business lead the way in digital colour printing.

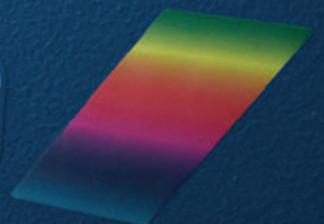

# Stay ahead of trends toward on-demand printing and electronic publishing

Technologies such as on-demand printing and electronic publishing are steadily becoming a reality. As a result, there has been a rapidly increasing need for jobs requiring smaller quantities, or incorporating variable data – keeping pace with the rapid speed of electronic media.

Konica Minolta has been conscious of these trends from the very beginning, and that's why the bizhub PRESS C1100 and C1085 are virtually future-proof. With these high-end production presses, our engineers have incorporated new capabilities, and an almost limitless digital workflow capacity.

## Impressive productivity up to 100 ipm on the bizhub PRESS C1100

### Uncompromising quality, speed and productivity

- High levels of productivity with up to 100 ipm per minute on the bizhub PRESS C1100, and up to 85 ipm on the bizhub PRESS C1085 (A4) on all media types
- Full rated output speeds on a wide range of paper types, and on media weights from as low as 55 gsm to a high 350 gsm
- Advanced precision print technology to deliver outstanding quality
- Enhanced media handling capability, thanks to the new fusing roller's expanded fusing belt contact area – resulting in extremely fast and consistent heat transfer
- More uptime and heightened productivity, with long-life consumables and Operator Replaceable User Maintenance capability
- Superb image quality with an expanded colour gamut
- Cutting-edge image processing technology, S.E.A.D. IV, which optimises engine characteristics. Expanded line-thinning capabilities reduce character thickness and enhance outline character background contours, so you can provide your customers with finely detailed reproduction quality – easily comparable to the best offset machines
- Impressive media flexibility, the bizhub PRESS C1100 and C1085 meet virtually any print job request, including SRA3 - A6 and custom sizes
- Duplex printing on paper stocks up to 350 gsm
- Advanced in-line finishing options to boost business opportunities. With an extensive range of finishing options including booklet trimming and perfect binding, the capabilities of the bizhub PRESS C1100 and C1085 are truly comprehensive
- User-friendly applications to streamline production

### Helping you meet environmental commitments

With all-round capabilities, the bizhub PRESS C1100 and C1085 have a number of features that help reduce your impact on the environment. Equipped with HD<sup>F</sup> toner, these digital presses are engineered to deliver strong environmental performance. A lower fusing temperature reduces damage to paper caused by heat for higher quality and reduced power consumption. Bioplastic materials are also used during manufacturing to further contribute to better eco performance.

# Superb output quality with productivity you can count on, around the clock

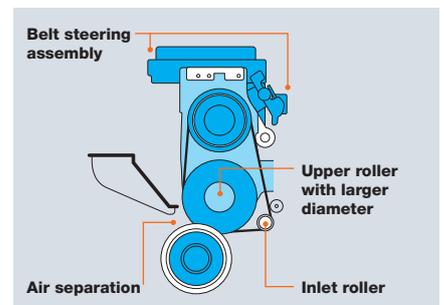

Impeccable accuracy, colour consistency and dependability will help you meet tight deadlines, and plan for long-term expansion of your business. Large quantities of widely-varied stocks can be pre-loaded, enabling maximum flexibility and short lead times.

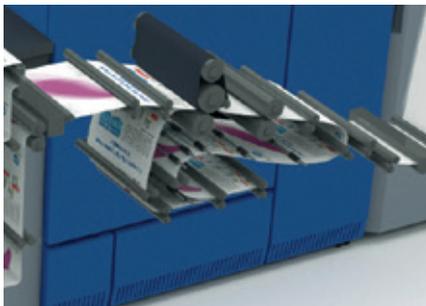

## Industrial-scale paper capacity

The paper feeding system can be expanded to handle up to nine varieties of paper stocks, all in one system configuration. Jobs can be kept moving with a maximum input capacity up to 13,890 sheets, and a maximum output capacity of 10,000 sheets. Paper replenishment can be performed on the fly – enabling your operators to process high-volume jobs with ease.

## Large diameter upper fusing system

The synergy between the newly designed large-diameter upper fusing system and HD<sup>E</sup> toner enables high speeds up to 100 sheets per minute for paper weights of 55 to 350 gsm on the bizhub PRESS C1100 (85 sheets per minute for bizhub PRESS C1085).

### **High level of paper compatibility**

Paper conveyance reliability has been enhanced with a new inlet roller and fusing belt steering mechanism and the inclusion of air blow fusing separation. This improves the handling of paper in a wide range of thicknesses and weights. These additions improve your print capability and make it much easier to meet the ongoing needs of printing on demand.

### **Ultra-precise image positioning**

Impress your most demanding clients with impeccable front-to-back registration accuracy, guaranteed by a high-precision registration unit which combines the existing paper skew detection/auto-correction mechanism with an interim roller nip release, and a registration unit skew correction mechanism.

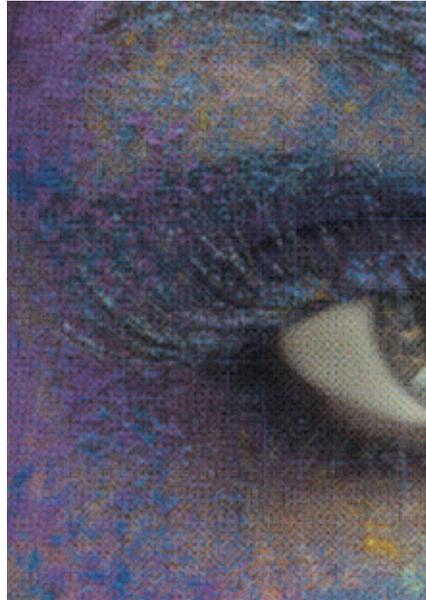

### **Maximising the print area to optimise use of paper**

The bizhub PRESS C1100 and C1085 can accommodate most standard paper sizes, as well as custom sizes. This large sheet size, when used with an imposition software ensures you are getting the most out of each printed sheet, enabling you to offer your customers the flexibility they're looking for.

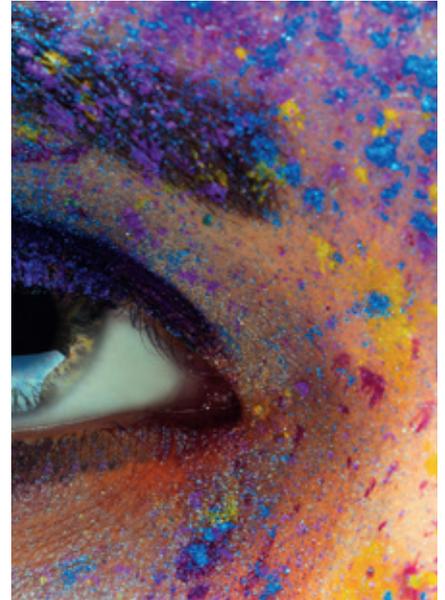

## S.E.A.D IV cutting-edge image processing

You can easily reproduce the finest details, thanks to S.E.A.D IV. This system applies dot position control (DPC) to left, right and center dotting points for each individual pixel. As a result, processing at 1,200 dpi produces resolution equivalent to 3,600 dpi – which helps minimise the fattening of lines or outline fonts. S.E.A.D IV technology and the use of screen processing enable these print systems to achieve smooth graduations that represent true life-like images.

Dot 190 (Default)

FM1

## Long-term image stability

A high-precision IDC sensor ensures consistent quality at high volumes, without loss of productivity. The sensor performs precise auto-calibration in real time, enabling control of image stability. To help overall stability, a cooling fan in the main part of the chassis maintains a constant temperature.

## Print controllers that deliver fast processing speed, outstanding colour and efficient workflow

### Easy job management and editing

The Konica Minolta internal print controller, IC-602C has been designed as a powerful print controller that integrates with the PRESS systems, offering leading functionality and control at system operator panel. This integration allows page integration, job combination and various changes to files without the need to re-print controller jobs saving time and effort.

We also offer a broad range of server based print controllers for the bizhub PRESS C1100 and C1085. These controllers are built on the latest system architecture with features and specific options that can grow your capabilities in digital colour.

EFI has two available server controllers that deliver on capabilities of fast processing speed, outstanding colour and efficient workflow automation to streamline processes and increase productivity. EFI Command workstation is a critical user interface that gives control functionality to all the EFI print controllers.

The IC-308 EFI Fiery server delivers on a standard offering that covers digital print requirements with EFI integration. Additional other advanced colour function software can be added as required.

With the EFI IC-310 server all the Fiery advanced digital colour tools are included, making this the most powerful and functional digital print controller available.

The unique Creo-Kodak digital workflow, the IC-312 should not be overlooked when seeking optimal processing power. This controller is ideally suited to multiply queue workflows and has the multi-print controller architecture to lead the way in variable data print capabilities.

# Comprehensive range of finishing options

With one of the widest available ranges of finishing options, you can tailor the bizhub PRESS C1100 and C1085 precisely to your business requirements. This flexibility will ensure you are equipped to meet your customers' needs today, and well into the future.

## Saddle stitcher (SD-510)

Use for saddle stitching, multi-letter-fold and centre-fold.

Saddle stitching

Centre-fold

Letter-fold-in

## Post Inserter (PI-502)

Add cover sheets and insertion sheets. Includes settings for two types of paper.

Sheet inserter

Cover sheet

## Punch Kit (PK-522)

Two- to four-hole punching for paper up to 300 gsm.

Two-hole

Four-hole

### Perfect binding unit (PB-503)

This is the finisher for in-line production of all kinds of perfect-bound books. The functionality offers the insertion of Z-folds and the inclusion of pre-printed colour covers and sheets. Book binding is possible for books with a spine width of up to 30 mm and includes in-line cover trimming. Perfect bound books are output into a trolley stacker. The integrated cover tray has capacity for up to 1,000 sheets.

Perfect Binding

Z-fold insertion

### Booklet making unit (SD-506)

The booklet-maker provides added value as ideal finishing equipment for all kinds of saddle stitched and trimmed booklets. It speeds up the online production of leaflets, brochures, catalogues and other marketing, sales and training materials.

Multi-centre-fold

Multi-tri-fold

Saddle stitching

Trimming

### Multi (GBC) punching unit (GP-501)

The multi punching unit offers high performance multi (GBC) punching of sheets at full system speed in preparation for offline spiral binding. Various available die sets correspond to the most popular punching schemes, such as metal-based coil (velo) and plastic (comb) binding.

Two-hole

Four-hole

### All-in-one finisher (FS-532)

FS-532 stapling finisher with staple cutter provides stapling for up to 100 sheets\* for beautiful finishes – regardless of the number of sheets – through enhanced paper output consistency and a refined paper path. A choice of three sub-options can also be fitted to expand the system when required.

\* Stapling for up to 50 sheets for A3 paper.

Corner stapling

2 point stapling

# bizhub PRESS C1100 / C1085 Specifications

## Technical specifications

Printer specifications	C1100	C1085
Print speed A4	Up to 100	85 ipm
Print Speed A3	Up to 53	46 ipm
Print resolution	Max.: 1,200 x 1,200 dpi x 8-bit	
Gradations	256 gradations	
<b>System specifications</b>		
Paper weight	55 to 350 gsm	
Duplex unit	Non-stack type, 55–350 gsm	
Paper sizes	A5–SRA3 (Custom Size 330 x 487 mm)	
Maximum image area	321 x 480 mm	
Paper input capacity	Maximum: 13,890 sheets. PF-707: up to 4,630 sheets. PF-708: up to 4,630 sheets	
Paper output capacity	Maximum: 13,600 sheets. Stacking unit with trolley: 5,000 sheets. Large capacity tray: 3,000 sheets. Per sub tray: 200 sheets	
Main unit dimensions (W x D x H mm)	900 x 950 x 1,319 (only main unit)	
Main unit weight	430 kg (only main unit)	

## Controller specifications

### IC-602C Enhanced Konica Minolta controller

CPU	Intel® Pentium i5 3.1 GHz
RAM	4 GB
HDD	500 GB
Interface	Ethernet (10/100/1,000-Base-T) with IPv6
File Formats	PDF, TIFF, JPEG, XPS
Client Environments	Windows® 7/2000/XP/NT 4.0/Server 2003, Macintosh OS 9.x and 10.x

### IC-308 external EFI Fiery controller

CPU	Intel® Core i5 2400 3.10 GHz
RAM	4 GB high-speed memory
HDD	1 TB Hard Drive
Interface	Ethernet (10/100/1000-Base-T) with IPv6, USB
File Formats	Adobe® PostScript controller® Level 1, 2, 3, Adobe® PDF 1.5 to 1.7, PDFX; EPS; TIFF; TIFF/IT; JPEG; PPML; Fiery® FreeForm™/Fiery® FreeForm™ 2.1
Client Environments	Windows® 7/2000/XP/Vista™, Macintosh® OSX or higher

### IC-310 external EFI Fiery controller

CPU	2 x Intel® Xeon E5 2643 3.3 GHz Quad Core
RAM	8 GB high-speed memory
HDD	2 x 1 TB DD SATA Drives
Interface	Ethernet (10/100/1000-Base-T) with IPv6, USB
File Formats	Adobe® PostScript controller® Level 1, 2, 3, Adobe® PDF 1.5 to 1.7, MS Document Formats, PDFX; EPS; TIFF; TIFF/IT; JPEG; PPML; Fiery® FreeForm™/Fiery® FreeForm™ 2.1
Client Environments	Windows® 7/2000/XP/Vista™, Macintosh® OSX or higher

### IC-312 external Creo controller

CPU	Intel® Core i7-3770 3.4 GHz
RAM	8 GB high-speed memory
HDD	4 TB (2 X 2 TB)
Interface	Ethernet (10/100/1,000-Base-T), NetBios802.1x Authentication
File Formats	MS Doc formats Adobe PostScript controller 3; Adobe PDF 1.3-1.7; PDFX-1a, PDF/X3-X4, EPS, TIFF 6.0; TIFF/IT; JPEG; PPML 2.2, Zipped PPML, PPML/VDX, VPS (AFP/IPDS – Trans Pack Required)
Client Environments	Windows® 7/2000/XP/NT 4.0/Server 2003

## Scanner specifications\*

Scan speed	Up to 42 opm
Scan resolution	600 x 600 dpi
Scan modes	TWAIN scan; Scan-to-HDD; Scan-to-FTP; Scan-to-SMB; Scan-to-E-mail; Scan formats TIFF (single and multi-page), PDF

## Copier specifications\*

	C1100	C1085
Copy speed A4	Up to 71	61 ipm
Copy speed A3	Up to 38	33 ipm
Gradations	8-bit	256 gradations
FCOT	Less than 7.1	7.6 sec. (colour A4)
Magnification	25–400% in 0.1% steps	
Multiple copies	1–9,999	

## Accessories

Paper feed unit PF-707	3 trays; Air suction feeding. Paper capacity: up to 4,630 sheets. Paper weight: 55–350gsm. Standard paper sizes: A5–SRA3. Min. paper size: 100 x 140 mm. Max. paper size: 330 x 487 mm
Paper feed unit PF-708	Equipped with ADF and Scanner. 3 trays; Air suction feeding. Paper capacity: up to 4,630 sheets. Paper weight: 55–350gsm. Standard paper sizes: A5–SRA3. Min. paper size: 100 x 140 mm. Max. paper size: 330 x 487 mm
Relay Unit RU-511	Enhanced Productivity Unit. Mechanical de-curler. Colour Density Sensor
Humidifier Unit HM-102	Humidification de-curler unit for RU-511
Finisher FS-532	Stapling of up to 100 sheets, 2-point and corner stapling, Variable staple length. Output for up to 4,200 sheets. Sub tray for up to 200 sheets. Off-set shift sorting and grouping
Post Inserter PI-502 **	Pre-printed sheet post inserter option. 200 sheet x 2 trays
Punch Kit FK-522 **	Punching unit, 2 or 4 hole punching
Saddle Stitch Unit SD-510**	Booklet making of up to 20 sheets (80 images). Output tray for up to 35 booklets. Centre staple, half-fold and tri-fold. Multi fold-in up to 3 sheets, Centre fold up to 5 sheets
Folding unit FD-503	Pre-printed sheet inserting 2 x 500 sheets (PI): Punching (2/ 4 hole). Folding (half-fold, z-fold, gate-fold, letter fold in, letter fold out, double-parallel-fold). Sub tray for up to 200 sheets
Relay Unit RU-510	Enhanced Productivity Unit. Sheet Turn Mechanism. Required in line with either GP-501/502
Multi Punching Unit GP-501	Multi punching of A4 sheets. User replaceable die sets for: velo bind, plastic comb, wire bind, colour coil, pro click. Paper weight: 75–216 gsm
Auto Binding Unit GP-502	On-line Automatic binding system. One size colour Bind element-fits all. Saddle Stitcher unit SD-506. Booklet making of up to 50 sheets (200 images). Saddle stitching, For-edge trimming. Output tray for up to 50 booklets. Multi letter fold in/ Multi half fold (up to 5 sheets)
High Capacity Stacking unit LS-506	Up to 5,000 sheets stacking capacity. Two units can be installed in tandem. Up to 10,000 sheets stacking capacity. Trolley mounted stacker with Clamp mechanism. Off-set stacking. Sub tray for up to 200 sheets
Perfect binding unit PB-503	Hot melt glue binding system. Integrated 1-side trimming of cover sheets. Books from A5 up to A4+ (307 x 221 mm). Books from 10 sheets up to 30 mm spine width. Cover paper tray for up to 1,000 sheets. Sub tray for up to 200 sheets. Book stacking capacity of up to 3,300 sheets
